PROFESSIONAL SUMMARY

Results-driven Network Engineer with 4+ years of hands-on experience in IIG and ISP environments. Skilled in designing, configuring, and maintaining complex network infrastructure including BGP routing, GPON/EPON deployments, OLT management, and enterprise-grade switching. Proven ability to monitor network health, perform root cause analysis, and deliver fast incident resolution in high-availability NOC environments. Currently advancing toward CCNA/CCNP certification.

EMPLOYMENT HISTORY

Engineer – Technology (NOC) | Exabyte Limited, Chittagong
Dec 2024 – Present

- Configure and manage routers, switches, and firewalls (BGP, static routing, VLANs, PPPoE) across ISP backbone.
- Maintain and troubleshoot OLTs (Huawei, BDcom Vsol & all vendors), ONTs, and GPON/EPON networks for FTTH subscriber infrastructure.
- Monitor network performance using LibreNMS, MRTG, and SNMP-based tools; proactively identify and resolve faults.
- Perform root cause analysis (RCA) on network incidents and generate structured RCA reports for management.
- Manage BGP peering with upstream providers and internet exchange peers.
- Administer IP address pools, subnetting, and IPAM for the network.
- Troubleshoot and optimize enterprise client connections including dedicated bandwidth, VPNs, and static IPs.
- Provide technical guidance to NOC staff and field engineers during escalations.

Sr. Executive – Technology (NOC) | Circle Network, Savar, Dhaka
Mar 2022 – Nov 2024

- Monitored and maintained network uptime across ISP infrastructure using NOC tools including LibreNMS and PRTG.
- Configured and managed MikroTik routers, OLT devices, and layer-2/layer-3 switches for subscriber connectivity.
- Diagnosed and resolved network faults including routing issues, link failures, and FTTH subscriber outages.
- Coordinated with field engineers and upstream providers to ensure timely incident resolution.
- Implemented firewall rules, NAT policies, and bandwidth management on MikroTik platforms.
- Maintained documentation of network topology, IP assignments, and incident logs in internal systems.
